

FOOTNOTE 1 Shared Services and Site Wide Allocations

The Shared Services pool consists of activities performed by the Site Management Contract (SMC) that benefit both SMC and River Protection Project (RPP) work scope. Other Hanford Contractor' usage of activities in Shared Services will be assessed on an estimated benefit of each activity, when their usage is considered significant. The assessments to Other Hanford Contractors are known as Site Wide Service Allocations. SWS assessments are treated as a non-cash revenue entry to the Shared Services pool that in turn, reduces the net accumulated cost of Shared Services. SWS assessments to Other Hanford Contractors of Shared Services are exempt from further allocation of Shared Services percentage adder.

Fluor Hanford-incurred administration charges in support of the Hanford Employees Welfare Trust (HEWT) will be accumulated in Shared Services and will be allocated to all participating employers (including CHG and FH). The costs will be billed based on each employer's respective active payroll.

Variable Service items listed for the bidders that are allocated in this manner are:

- **Acceptance Inspection**
- **Heavy Equipment Operations**
- **Fire Systems Maintenance and Testing**
